

Maksim Levchenko

Senior Backend Developer (PHP / Laravel)

Ukraine (remote) +380932040418 maxcena2015@gmail.com

Profile

Senior backend developer with 6 years of commercial experience, mostly with PHP and Laravel, and solid full stack experience with Vue.js and React. I have owned the backend of live production systems, designed APIs and architecture and reviewed code.

I have worked on large-scale platforms with large volumes of data and many active users, where I regularly optimized slow queries and endpoints, in some cases making them up to 10x faster. I build AI-powered features into real products and know how to use AI in development in a way that keeps code reliable and maintainable.

Work Experience

RealtorCoNZ

June 2026 – Oct 2026

Backend Developer (Contract)

- Owned the backend of a New Zealand real estate platform, maintaining the live Laravel Listings API.
- Designed the architecture and API contracts for the next version of the platform (Python, Next.js/React, PostgreSQL with PostGIS) and led technical decisions.
- Reviewed the team's code and implemented security fixes for the production system.
- Identified malicious code injected into the codebase and stopped it from reaching production. Following this incident, the client paused the project.

Net Actuate

Feb 2025 – June 2026

Full Stack Developer

- Worked on the internal platform and microservices of a global cloud and edge infrastructure provider, using PHP (Laravel, Livewire), Python (Django) and Vue.js.
- Led a major version upgrade of Nautobot, a network automation platform used by the DevOps team.
- Moved legacy API clients to the new API through a compatibility layer, so the transition was seamless for all users.
- Built an interactive world map showing data center metrics, and wrote tests that caught critical issues before releases.

WolfLogic (project Revoic AI)

Feb 2024 – Nov 2024

Full Stack Developer

- Built Revoic AI, a web service that generates Amazon product listings with the OpenAI API, using Laravel and Vue.js.
- Integrated the Amazon SP-API to retrieve and manage marketplace data.
- Optimized the system for performance and reliability of AI-based tasks.

WolfLogic

Sep 2023 – Nov 2024

Full Stack Developer

- Developed Laravel web applications with Vue.js and React, including a concert ticket management platform and a wine club website.
- Integrated third-party APIs and webhooks, including payment systems.
- Worked on a large UK platform for horse passports, processing 100+ applications per day and storing 100+ GB of passport documents and images.
- Built and maintained the full passport flow: application processing, PDF generation, online digital passports, payments and a separate portal for veterinarians.

Galaxy Coding

Dec 2022 – Dec 2024

Backend Developer

- Developed Guardey, a cybersecurity learning SaaS, on Laravel with a GraphQL API: database schemas, queries and mutations.
- Made a key page 10x faster through query and database optimization.
- Worked on an internal B2B platform for managing trade deals and invoicing between agribusinesses.
- Traced and fixed a long-standing bug that blocked about 15% of monthly invoicing.

Savy Agency

Nov 2021 – Dec 2022

Full Stack Developer (Contract)

- Built WordPress sites from scratch and headless WordPress sites with React and AngularJS, including Tallen Inc, Flybend and Brentwood Fine Wines.

Upwork

May 2021 – Present

Freelance Full Stack Developer

- Laravel web applications with Inertia and Vue.js for clients, including blogcast.host.
- Integrations with OpenAI, Amazon SP-API, Exact, HubSpot, Microsoft Teams, Mandrill and other services.

IT-Banda

Mar 2020 – Apr 2021

Backend Developer

- Worked on photohunter.pro, a platform where photographers share and sell their photos: payment systems, paid features, access restrictions and performance optimization.

Skills

Backend: PHP, Laravel, Livewire, Python, Django, REST API, GraphQL, queues and jobs, OOP, SOLID

Databases: MySQL, PostgreSQL, PostGIS, Redis

Frontend: Vue.js, React, Next.js, Inertia, JavaScript, HTML, CSS, WordPress

Tools: Git, Docker, Linux, AWS, PHPUnit, Claude Code, Codex

Education

Taras Shevchenko National University of Kyiv, Faculty of Computer Science and Cybernetics

Master's degree in Applied Mathematics, 2022 – 2024

Bachelor's degree in Applied Mathematics, 2018 – 2022

Languages

English (Professional working proficiency), Ukrainian (Native), Russian (Native)
